

Looking at our common house
we see so many things that hurt us
precisely because it is our house

and

all - women and men -

we are that house.

In the middle of these situations,
who also has lived and accompanied them,
our brother and friend,

tells us:

go and tell my brothers that life makes sense,

it's worth living ...

It's a gift to share ...

Do not be afraid to live the best of each one of you: love ...

there are many hearts

They are brand new and live their true truth:

to love...

stand up,

take up your story

and walk, day by day,

gestating the fraternity.

Another world is possible ...

every seed that is sown generates life ...

sowing, sowing ...

happy Easter
